### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yutaka (JP 08-050290).

Yutaka discloses a method and apparatus for adhering a polarizing plate. As shown in the figures, a substrate 12 is positioned on holding mechanism 10. This holding mechanism moves the substrate past adhering mechanism 30 and pressing roller 22. Adhering mechanism 30 includes stripper bar 36, which separates release film 41 from polarizing plate 40. After being separated, polarizing plate 40 is pressed against and adhered to substrate 12 by pressing roller 22.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-3 and 5-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yutaka as described above in paragraph 2.

Art Unit: 1734

Without the disclosure of unexpected results, it is the examiner's position that tilting and holding as well as the means for tilting and holding the polarizing plate are within the purview of one having ordinary skill in the art and would have been obvious to employ in the method and apparatus of Yutaka in order to facilitate application of the polarizing plate.
